Interactive Installer by EDB

Download the installer certified by EDB for all supported Postgres versions.

Note! This installer is hosted by EDB and not on the PostgreSQL community servers. If you have issues with the website it's hosted on, please contact webmaster@enterprisedb.com.

This installer includes:

- The PostgreSQL server
- pgAdmin, a graphical tool for managing and developing your databases

This installer can run in graphical or silent install modes.

The Windows installer is designed to be a straightforward, fast way to get up and running with Postgres. In the unlikely event that you have issues with the installer, please report them on the [installer Github page](#). Issues with the installed packages should be reported to the appropriate project directly.

Advanced users can also download a [zip archive](#) of the binaries, without the installer. This download is intended for users who wish to include Postgres as part of another application installer.
